5 March

By Lungelo Mkamba, Kyle Venktess and Sapa

Hundreds of families have been left homeless and many roads and streets in Durban and other coastal areas north of the city right up to Kosi Bay were turned into raging rivers as tropical cyclone Irina caused chaos across the province. The weather services said that gale-force south-westerly winds (65 km/h) were expected on Monday. There was a warning of very rough seas with waves up to 6 m.

'A combination of very rough seas, marine storm surge, as well as gale-force winds was likely to threaten the coastline,' said police spokesperson Colonel Vishnu Naidoo. In Jozini in the Nyawushadi area a house collapsed on a woman, breaking her legs, after floods hit northern KwaZulu-Natal on Sunday morning.

Disaster teams were still quantifying the damage, but Naidoo estimated that at least 300 houses had been flooded.

FIGURE 4.5: JOB LOSSES IN THE FORMAL SECTOR**FORMAL SECTOR SHEDS (LOSES) JOBS**

TJ STRYDOM | 14 August, 2012

Jobs are 'seeping' from the formal sector of the economy into the informal sector, according to the latest Employment Index.

More than 10 000 jobs were created in the informal sector last month but almost 7 000 were lost in the formal sector, mostly because of labour regulations and taxes.

Construction, financial services and manufacturing were among the hardest hit.

Employment in the construction industry declined by more than 11%, according to the Index, and in manufacturing and financial services by around 4%.

With SARS registering 385 000 businesses as new taxpayers in the past eight years, many enterprises have moved to the informal sector to avoid paying taxes.
